

ECG Contest

ECG, July 2017

ECG de julio de 2017

Moisés Rodríguez-Mañero,* Javier García-Seara, and José Luis Martínez-Sande

Unidad de Arritmias, Servizo de Cardiología, Complejo Hospitalario Universitario de Santiago de Compostela (CHUS), Santiago de Compostela, A Coruña, Spain

An evaluation is requested for a patient who has episodes of atrioventricular block (AVB) in the Holter-ECG study (Figure A, Figure B, and Figure C).

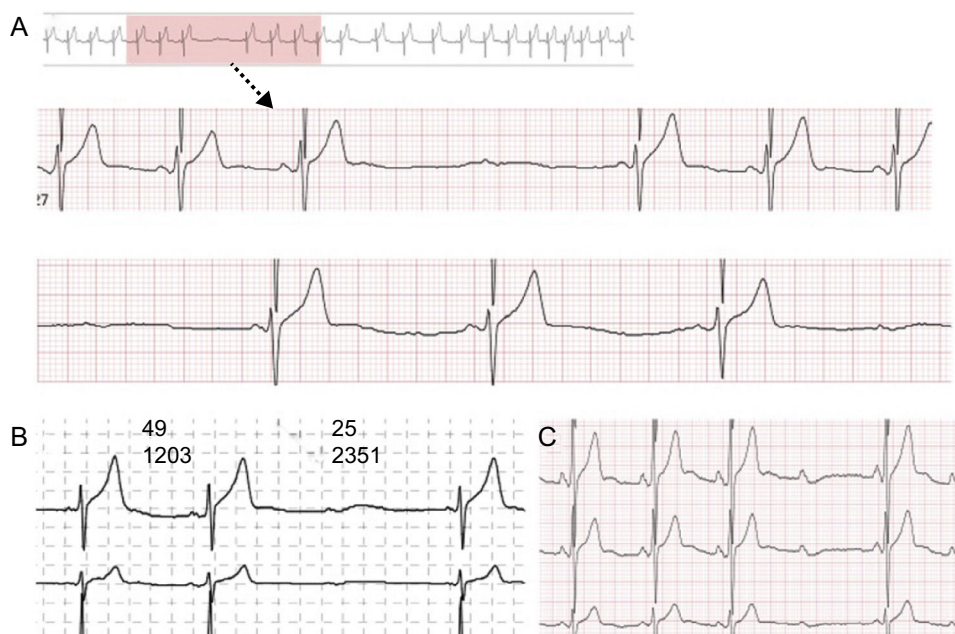

Figure.

What disorder do you think he has?

1. Mobitz II second-degree AVB
2. Bradycardia-dependent AVB
3. Vagally-mediated AVB
4. All options correspond to the same underlying disorder, and are therefore to the same approach.

Suggest a diagnosis to this ECG Contest at <http://www.revespcardiolog.es/electroreto/70/7>. The answer will be published in the next issue (August 2017). #EKGchallenge.
