

ECG Contest

Response to ECG, December 2014

Respuesta al ECG de diciembre de 2014

Pablo Peñafiel Verdú

Unidad de Electrofisiología y Arritmias, Servicio de Cardiología, Hospital Clínico Universitario Virgen de la Arrixaca, Murcia, Spain

The [Figure](#) shows wide QRS tachycardia and dissociated atrial activity ([Figure, arrows](#)). Thus, the patient exhibits ventricular tachycardia and dissociated atrial tachycardia. In addition, in the complete electrocardiogram shown in the ECG Contest, it can be seen that the ventricular tachycardia subsides spontaneously and is reinitiated following 2 beats of narrow QRS atrial tachycardia.

Figure.
