AUTHORS' CORRECTION

In the article titled «Spanish Registry on Cardiac Catheterization Interventions. 11th Official Report of the Working Group on Cardiac Catheterization and Interventional Cardiology of the Spanish Society of Cardiology (years 1990-2001),» published in the November issue of the Rev Esp Cardiol 2002;55:1173-84, the authors wish to make the following corrections:

On page 1179, the number of cases of brachiotherapy is inverted. There were 74 re-stenotic lesions and 33 new stenotic lesions.

In Table 3, on the same page, the stents/procedure number for 2001 is 1.43 and not 1.25.
