Response to ECG, July 2015

Respuesta al ECG de julio de 2015

Antonio Tello-Montoliu

Servicio de Cardiología, Hospital Clínico Universitario Virgen de la Arrixaca, Murcia, Spain

Sinus bradycardia with slight ST-segment elevation, negative T-wave and Q-wave in lead III, less evident in aVF, with straight ST-segments in V₂₋₃ and peaked T-wave. These leads led us to suspect an inferoposterior condition. Right and posterior leads were used, which confirmed our suspicions (Figure).

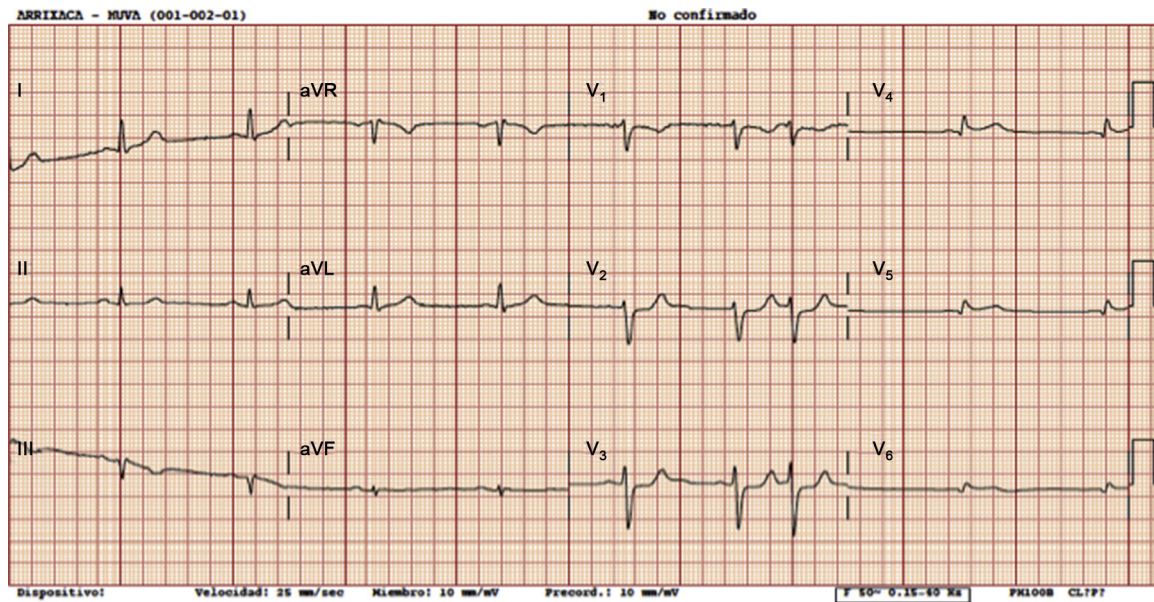

Figure.
