Response to ECG, November 2015

Respuesta al ECG de noviembre de 2015

Sonia Mirabet

Servicio de Cardiología, Área de Miocardiopatías, Unidad de Insuficiencia Cardíaca y Trasplante Cardíaco, Hospital de Sant Pau, Barcelona, Spain

The echocardiogram (Figure A) shows a nondilated mildly hypertrophic left ventricle with preserved contractility, significant biatrial dilatation, a type I diastolic dysfunction mitral flow pattern, and significant dilatation of the suprahepatic veins, all of which is compatible with a diagnosis of restrictive cardiomyopathy. Right heart catheterization confirmed the restrictive physiology.

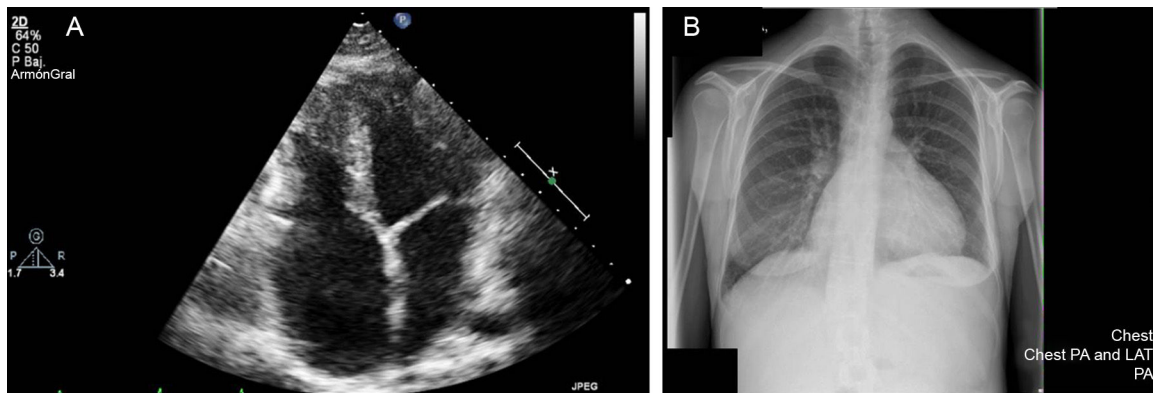

Figure.
